

## Flour Sack Packing Machine

Heavy bag powder packaging unit is a new type of packaging unit which is designed for powder material packaging in chemical industry, agriculture, food industry and grain industry. The unit has the functions of automatic bag feeding, bag loading, filling, sealing and bag sending, and can also work with all kinds of materials and equipment to realize the unmanned production of large size packaging.

### Technical parameters:

1. Packaging materials: woven bag (coated film), Kraft paper bag, and composite film plastic bag (film thickness is greater than 0.18 mm)
2. Package size: 700-1100mm long, 480-650mm wide
3. Packing weight: 25-50 kg/ bag
4. Packing speed: 3-8 packages/min
5. Measurement accuracy: + / - 50g

### Sealing method:

1. Woven bag: hem folding/seam sewing
2. Kraft paper bag: heat sealing/sewing
3. Composite film plastic bag: heat seal
