

PE Film Shrink Packaging Machine SM6040/SM6540

Used to shrink large quantity products such as pop-top cans, beer and mineral water etc, and used in wood, steel, ceramics, electric appliance and computer industries. Specially designed for shrinking some big and heavy products packed with PE film. The conveying belt can be made of rollers, or Teflon mesh belt, or S/S mesh belt according to different requirement. Can finish the shrinking in a short time even for a big product, and it is smooth and compact after the shrink, convenient for piling, and ensures the product quality and needs for long distance transportation, uses films such as PE, PVC and POF etc. Top bottom side tunnel fixed the stainless steel heater to heat tunnel quickly and prolong the usage life. Up and down large power fan system and super cooling system to ensure the excellent effect of shrinking.

Technical Parameters:

Model	SM6040	SM6540
Voltage	380v	380v
power	20kw	24kw
speed	15m/min	15m/min
tunnel size	1500×600×400mm	1800×650×400mm
machine size	2800×850×1580mm	3200×950×1580mm
machine weight	380kg	400kg
Conveyor loading	35kg	35kg
Temperature	0-250°C	0-250°C
