

Automatic Feeding Horizontal Flow Type Wrapping Machine (YW-ZL400A)

This model is used to packing cylindrical shape, unregular shape, etc, like chocolate enrobing bar, cereal bar, wafer etc.

Advantage:

This flow packing machine adopts the inclined feeding disc. For some extruder puffing cereal bar, the product is random when produced by the production line.

The product output is not uniformly aligned. it's not efficient feeding through the horizontal feeding line. Inclined feeding disc had the advantage in packing the random output product.

Application:

Food and confectionary, bar product, candy, chocolate, biscuit, wafer product etc.

Electrical Parts:

- Servo Motors adopt Japanese Yaskawa Brand (five or seven servo motors for the choice).
- Frequency converters adopt the France Schneider.
- PLC and Touch screen use the Japanese Omron.
- For the special quirement, we provide the customized service.

Technical parameters:

Model	YW-ZL400A
Packing Type	Pillow Pack
Packing Speed	50-500 pcs/min
Product Dimension	according to product
Total Power	7.3kw
Voltage	220/380V/50/60HZ, 3phase or 1phase available
Weight	3000kg
Outside Dimension	5420*1386*1795mm
Wrapping film	OPP, CPP, PET, Aluminium plating film, aluminium plastic film, hot-sealing film, etc.
