

BGF-CRR Automatic Cup Filling & Sealing Machine

Automatic cup filling and sealing machine is applicable for liquid, semi-liquid, powder and granule filling into cups, bowls and plastic boxes etc. The filling containers can be round, square and special shaped in plastic (PS, PP, PVC, PET, etc) and paper (there should be a film inside the surface of container). This machine is widely used in beverage and food industries.

Features:

1. Stable and reliable functions, security and alarming functions
2. Filling volume precisely and seals cups perfectly
3. Stepless speed control, can adjust filling time.
4. Alumite as moving moulds, extraordinary durable and sanitary
5. All the components are made by famous company in the world.
6. Equipped with noise reduction device, comfortable for operators.
7. PLC control, high precision filling, can pack different cups.

Technical Parameters:

Model		BGF-CRR1	BGF-CRR2
Power	KW	2.2	3
Packing Speed	cups/h	600-800	1500-1800
Air Pressure	MPa	0.65-0.85	0.65-0.85
Air Consumption	m3/min	0.6	0.7
Machine Dimension	mm	900*900*1350	1250*1250*1350
Weight	KG	400	450
