

## Two-in-one Shrinking Packaging Machine BSE5540

1. Two-in-one shrinking packaging machine set seal, shrink in one, a machine, double effect, the right side of the sealing device sealing effect tight, beautiful;
2. Through the glass cover to see the shrinkage of packaging, visualization of a high degree of operation, heat shrinkage process is simple, fast, efficient, continuous long operation will not lead to the surrounding environment is too hot.
3. High cost, sealed with PITFE ceramic durable, membrane frame with roll film pinhole equipment, fully emptying the film air, a multi-purpose machine can be sealed at the same time heat shrinkage, but also a single seal, Or a single heat shrink; suitable for PVC, PP, POF and other shrink film sealing heat shrinkage;
4. Due to sealing and contraction in the same space, the machine utilization is extremely high, the equivalent of reducing the occupied area of the machine, the use of flexible and convenient;
5. Low power consumption, the average power consumption per hour is only 2.5KW, affordable, to ensure that the packaging effect, reduce costs and reduce the loss of packaging materials.

Model	BSE5540
Maximum Seal Size	550X400
Sealing time	0.4-0.8S
Contraction time	2-6S
Power / Power	220V50HZ2.5KWH
Speed / times	300-500 / H
Dimensions	1360X730X1450
