

Dip Tea Bag Packing Machine LG-T1

China dip tea packing machine is an automatic tea packing machine produced by our company. We have received unanimous praise from our customers since we launched this product. The exterior of the machine is made of stainless steel.

Elegant and beautiful, small size, small area, suitable for large-scale use of factories. This machine can be used for packaging tea, herbal tea, health care tea and other small particles in bags. Moreover, the machine adopts the working principle of rotating filling to seal the product. This machine can complete a series of automatic filling, sealing, cutting film and so on.

Advantage Of Dip Tea Bag Packing Machine

1. The film is controlled automatically by the stepping motor during the operation of the china dip tea packing machine.
2. The temperature controller of PID regulator is fully adopted in this machine system, which can make the temperature control more accurate and stable, and is conducive to the packaging of products.
3. In addition, the machine also adopts PLC control motor system. Dip tea bag packing machine is displayed by the man-machine interface, which makes the operation more convenient and fast, which is conducive to improving the product efficiency.
4. All contact materials of this machine are made of SUS304 stainless steel, which can ensure the health and safety of the product.
5. China dip tea bag packing machine is a fully automatic machine, which can complete the flat cutting of accessories, date printing, easy tear and other system functions at one time.

Technical Data:

Model	LG-T1
Application	Tea/Herbal/Coffee etc
