

Automatic Can Seaming Machine – CE-100L/FGJ

- The design of operation panel is reasonable and simple, which facilitates adjustment and maintenance.
- It has high production capacity and degree of automation which may save labour cost. It is applicable as equipment of sealing and filling production line.
- Sealed reel adopts two-reel sealing. The sealed reel is perpetually rust-proofing. It has extremely good sealing performance.
- The can is designed as not rotating during the sealing process. It requires high processing precision. Its sealing quality is superior to that of similar products in China.
- Applicable for sealing of various tin cans, aluminium cans, paper cans and all kinds of round cans, simple in operation, and it is an ideal equipment of food, beverage, pharmaceutical and other industries.

Technical Parameters:

Model	CE-100L/FGJ
Control method	Automatic
Number of seaming head	1
Container moving method	Rotary plate
Height of container	50-200mm
Diameter of caps	Specified within 35-100mm
Lidding speed	30-35 cans/min
Power requirement	AC220v 50/60Hz
Electricity consumption	1.1kw
Lid auto-pre capping	Yes
Approximate net weight	500kg
Dimension	3000 x 900 x 1800mm
