

OC-420AZT High Speed All-in-one Packing Machine

The High Speed All-in-one Packing Machine automates weight measurement, bag making, filling, sealing, bag cutting and counting. It is an integrated weighing module, which saves space and increases the overall packaging speed. The machine adopts computer PLC control system and color touch screen to make the operation simple and efficient. Packing will be easier and faster with the High Speed All-in-one Packing Machine.

Features

Our High Speed All-in-one Packing Machine features a noiseless stepper motor that improves stable working conditions and reduces vibration and noise. And it uses high-quality steel and branded components for a long machine life. In addition, it can also have high-sensitivity photoelectric eye tracing, accurate cutting and positioning, excellent machine performance and exquisite packaging. The equipment adopts a variety of automatic alarm protection functions to minimize losses.

Technical specifications:

| Type | OC-420AZT |
|------------------------|----------------|
| Bag Width | 60-200mm |
| Bag length | 80-300mm |
| Max width of roll film | 420mm |
| Packing speed | 5-60bags/min |
| Weighing range | 50-200g |
| Weighing speed | 65ppm bags/min |
