

Automatic Capsule Filling Machine NJP-800C

NJP-800C automatic capsule filler processes the products for optimal productivity up to 800 capsules per minutes, featuring low-maintenance operation, minimal downtime, and overall dependable production.

Powder dosing uses the 5 stage tamping technology for an enhanced accuracy. Filling of pellets is available.

Capsules from the bunker are fed into the orienting device along the vertical guide.

Then they are transferred into special cells on the rotor. Here the capsule is separated, after what the bottom part comes to the filling position.

After filling the bottom part with the material, on next positions, the non-separated capsules are rejected, and the filled bottom parts are joined with top parts, counted and taken away into the receiving box.

Specifications

Machine model	NJP-800C	NJP-1200C
Max capacity	48000capsules/hour	72000capsules/hour
Suit for capsule size	00#-5# and safety capsule	00#-5# and safety capsule
No.of mould bores	6	9
Power	380/220v,50/60Hz,5kw	380/220v,50/60Hz,6kw
Noise	<75dB	<75dB
Machine dimensions	1080x1240x1930mm	1180x1340x1980mm
Net weight	800 kg	1000kg
