

CZDG Semi-Automatic Single-Head Weighing Filling Machine

The weighing type filling machine is suitable for filling the various dope, oil paint, printing ink, pastern, organic solvent, daily chemical liquid, detergent, pesticide, medicine, lubricant, edible oil, sauce, ink, paste lotion, all kinds of flowing liquid and so on.

Application

- Being suitable to the semi-auto filling of 1-50kg bucket-packing material with good fluidity.
- The weighing type-filling bag in box filler is new type filler integrating the electronic scaling technology, machinery, electronics, and instruments on a whole.
- The weighing type-filling machine for large volume owned the digital displaying function of the filling quantity.
- The semi-automatic weighing type-filling machine is for filling the large volume and can finish multi-kinds filling quantity setting.

Specifications

- Weighing filling with electronic scale, so the filling precision of weighing type quantitative beverage filler is very high.
- This weighing type-filling machine for large volume can be used in filling 1-50kg bucket materials, just like this oil, detergent, etc.
- With emergent treatment to avoid misuse and protect power-off.
- With manual & automatic micro switch control system function.
- Latest control technology of micro computer
- The weighing type-filling machine for large volume owned the digital displaying function of the filling quantity.
- The semi-automatic weighing type-filling machine is for filling the large volume and can finish multi-kinds filling quantity setting.

Technical Parameters:

Measure precision	0.3-0.5%
Filling scope	1-50 kg
Production capacity	50~150 buckets/ hour
Entrance pressure	0.2~0.5M pa
Air pressure	0.5-0.7M pa
Power source	200W, 380/415V 50/60HZ 3P
Gross Weight	150 kg
Packing dimension	800×800×1600 mm
