

DH-Q3-DS Sea Salt Paper Can Seaming Machine

Our integral line system/powder filling line is designed for filling powder products into bottles or cans. Our staff will help you to plan and suggest you the best machine choice to use. Auger has the complete filling machine types to provide to the business owners and they can consider purchasing the machines with single unit or full integral production line.

In addition, Auger provides overall solutions of raw material for machinery construction, sieve shakers, air washers, capping machines, labeling machines, electromagnetic induction mechanisms, and weight checker. Machines of Auger would help you to enhance your integral production line and improve the quality, speed, and accuracy of the products.
