

## *MM-300R Automatic Round Bottle Labeller*

Automatic Wrap Around Labeling Machine is suitable for the foodstuff, medicine, cosmetics and other light industries of the planform label. This machine is advanced, easy operation, structure compact. Adopt to photo-electricity examine, PLC controller, Touch screen operation, feeding, Labeling, product disport are all stepless for speed adjust, label nicety; at the same time it has the function of no object no labeling, no label can revise by itself, and automatic to check. This machine can be used alone; also it can use with other packing machines for automatic production line.

### **Application:**

Automatic Wrap Around Labeling Machine is suitable for the foodstuff, medicine, cosmetics and other light industries of the planform label.

### **Features:**

1. The PLC control combined with touch screen providing user friendly operation and high precision.
2. The memory of 60 groups of labeling specifications can exchange the production line quickly.
3. The equipment is up to the mustard of GMP requirements and made of SS304 which is treated by anodic of high-class aluminum alloy.
4. The machine has many functions such as count, attach label and so on.
5. The labeling position of height and angle can be adjusted.
6. The modular-design makes this machine suitable for operation together with other machines or in a production line.
7. The machine can be used to label the body and bottleneck at the same time with some changes.
8. The hot printer and transparent label sensor are optional.

## Technical Specification

<b>Model</b>	<b>MM-300R</b>
Voltage(V/Hz)	220/50 or 110/60
Power(Kw)	1.1
Labeling Speed(b/min)	20-200
Bottle Diameter(mm)	Ø30-120
Label Size (mm)	H:15-140 L: 25-300mm
Labeling accuracy (%)	±1
G.W(kg)	150
Shipping Dimensions(mm)	2000×1100×1300
