

Gel Filling Packing Machine

It is suitable to pack liquid and paste materials in the fields of food industry, pharmacy industry, and daily chemical. Such as peanut butter, ketchup, bee honey, shampoo and so on.

Manual:

Machine body of the machine is full stainless steel pump. Measured with plunger pump, this machine can be adjusted at will in the rated materials, and finish the functions such as bag making, measuring, filling, sealing, cutting, counting and batch printing. The measurement can be done by different pumps.

Features:

1. The machine has adopted a PLC programmable controller and matched with English and Chinese display screen. Thus, it's easy to operate, convenient in adjustment and super automatic.
2. Advanced photoelectric tracking system is adopted; pouch length can be set directly at the tender side of machine. When using packing film with cursor mark, the first pouch can seize cursor mark, get correct design picture. In-phase bag pulling system make pouch smoothly and correct. Light touch the buttons below display screen according to the screen's indicate, number input and display, air proof, insulated, high corrupt proof, easy to operate.

Technical Paramet

Packing speed	20-40 bags/min
Range of measuring	1-10ml
Pouch length	30-140mm
Pouch width	30-80mm
Style of bag-making	Three-side sealing, four-side sealing, or back sealing
Electric source	220V, 50HZ ,Single Phase
Total power	1.5KW
G.W.	280kg
Package size	L1250 * W900 * H1850mm
