

## ZHB-100 Automatic Cartoning Machine

ZHB-100 multi-functional automatic cartoning machine is widely applied in plastic bottle, glass bottle, tube and other similar objects cartoning packing. The machine can automatically finish filling packaged objects, folding instruction, opening carton, inserting packaged objects and leaflet, printing batch No, close carton and finished product output functions.

- The machine can be optional ink jet printer, glue machine, bar code reader, etc..
- Machine using mechanical pusher, each agencies work coordination, stable and reliable.
- Adopts frequency speed adjust, PLC automatic control, touch screen operation, operation easy and running stable.
- Lack of instructions, lack of bottle, tube, machine automatically detect and reject.
- Automatic servo feeding device.
- Steel character embossing.
- Can be connected with labeling machine, tube filling machine.

### Technical parameters

Production Capacity	100 Cartons/min
Main motor power	1.5 kw
Compressed air	0.5 Mpa >0.6m <sup>3</sup> /min
Air consumption	≥ 0.9 m <sup>3</sup> /h
Machine Dimensions	2800×1350×2000 (mm)(L*W*H)
Machine Weight	1500 Kg
