

WB-F1/2/4 Full Automatic Auger Powder Filling Machine

Full Automatic Auger Bottling Powder Filling Line Spice Powder Filling Machine Jar Washing Powder Filling Machines, Workflow: powder lifting → bottle unscrambling → adding rubber stopper → adding cap → capping → bottle collecting.

This machine is mainly used for filling pepper, flavor spices, milk powder, protein powder, toner, chemical powder, talcum powder, etc.

Product Advantages:

1. Workflow : powder lifting → bottle unscrambling → filing → adding rubber stopper → adding cap → capping → bottle collecting.
2. Modular transparent product hopper, easy dismantle and clean without tools.
3. Adopts servo motor drive spiral, has advantages of high measuring precision, not easy to wear, and stable performance, etc (when the filling volume has large diference, the corresponding screw needs to b9 replaced).
4. Use advanced PLC control system, color touch screen display.
5. For multiple dust materials, the product outlet can be installed dust colection device.
6. Discharging outlet has automatic locking device, prevent leakage of material.
7. Machine chell and all nats Contact product are made of 304 stainless steel, meets C standard.

Technical Parameters

Model	WB-F1/2/4
Filling head number	1/2/4
Adding plug head	1/2
Capping head number	1/2
Power	1.8 KW
Power supply	1Ph.220V, 50/60Hz
Capacity	5-20 bottles/min
Net weight	500KG
Machine dimension	L2200*W1500*H1900mm
