

## *LFFM-0604 Powder Filling Machine*

The powder filling machine is a production line specially equipped for powder filling; it is a device with online metering and filling functions.

### **The specific features are as follows:**

1. The system adopts industrial computer control, the touch screen directly clicks the menu operation mode, and the parameter adjustment is convenient and intuitive.
2. Suitable for granular materials with good fluidity, powder filling with a filling volume of 6-20ml.
3. All parts in contact with the product are made of stainless steel and aluminum, never rust, pollution-free, and comply with GMP environmental requirements.
4. All system control components have international standardization certification, and have undergone strict inspection and testing to ensure the reliability of various functions.
5. The working status and failure of this machine have the function of reminding and warning, which makes the operation and maintenance more convenient and safe.

## Technical Parameters

Model	LFFM-0604
Max. speed	120bpm
Nozzle qty.	4pieces
Filling accuracy	±3%
Bottle diameter	28 mm
Bottle height	50~200 mm
Power supply	220V 50/60Hz
Compressed air & Air consumption	0.4 –0.7MPa、30L/minn
Power consumption	1.8KW
Machine dimension / L*W*H	2000mm(L)x1650mm(W)x1680(H)
Machine weight	800Kg
