

YPJ-C Capsule Polisher

YPJ-C capsule polisher is a professional medical polisher that is widely used in pharmacy. Under the drive of continuously variable motor, it can polish and clean the dust attached to the capsule and medicament in order to keep capsules clean and improve the smoothness of surface. Our capsule polishing machines are newly designed to polish capsules and tablets as well as to eliminate static.

Features

1. The height and angle can be adjusted to fit into any chute or tilted trough of the capsule filling machines and tablet presses.
2. Capsule polishing machine can automatically reject light, fragmented and empty capsules.
3. New net type cylinder ensures no jammed capsules during operations.
4. The capsules are not directly contacted with the metal net to protect the printed capsules effectively.
5. YPJ-C capsule polisher is well designed for quick cleaning and maintaining.
6. The three phase motor is controlled by a frequency converter, which is beneficial to long continuous operations.
7. Brush of our capsule polishing machines is easy to change and it is durable.

Parameters

Model	YPJ-C
Capacity (grains/min)	7000
Power Supply	According to user's requirement
Overall Dimensions (mm)	1150 × 400 × 1000
Packing Dimensions (mm)	1300 × 500 × 1200
Net Weight (kg)	45
Gross Weight (kg)	65
