

WF-130 Lab Scale Hammer Mill Pulverizer

This machine is of hammer type with high speed and applied for crushing materials with medium hardness and viscosity. The material is fed into the crushing chamber through a hopper and crushed by high speed rotating hammer. The machine whose crushing chamber is easy to assemble and clean, has simple structure. Wholly made of stainless steel, the machine makes the crushed material met the hygienic requirement.

Technical Parameters

Production Capacity	5-30 kg/h
Feeding Size	≤2mm
Crushing fineness	80~400mesh
	(herbal medicine),
	30~400 mesh for chemical API
Motor power	1.5kw
Spindle speed	13900r/min
Weight	90kg
Dimension	400*500*850mm
