

RZ10-100-14ZK Rotary Vacuum Packing Machine

RZ10-100E-14ZK Rotary Vacuum Packing Machine is an automatic vacuum packing machine designed for a variety of products, making it a versatile option for various industries. The machine is capable of vacuum packaging various shapes, states, and natures of products, including rice, coarse grains, nuts, spicy snacks, and Chinese chestnut liquid, among others. The RZ10-100E-14ZK Rotary Vacuum Packing Machine is an automatic vacuum packing machine is equipped with a PLC controller and an HMI system, making it easy to operate. The machine can also be adjusted synchronously, and parameters for different products can be saved and available from a database when changing products.

Features of RZ10-100E-14ZK rotary vacuum packaging machine

One of the outstanding features of RZ10-100E-14ZK Rotary Vacuum Packing Machine is its high automation, as it completes all actions by a grooved clamp that is more durable than an end cam, and it does not need springs to return, making it more stable in running. Additionally, the RZ10-100E-14ZK rotary vacuum packaging machine has a perfect prevention system that ensures that when the bag is not open or not opened enough, it will be non-filling and non-sealing, so the empty bags return to the first station to refill, which helps to save production costs.

RZ10-100E-14ZK Rotary Vacuum Packaging Machine Hygiene and Safety

RZ10-100E-14ZK Rotary Vacuum Packing Machine is designed with sanitation and safety in mind, meeting the GMP standard. The machine is made of stainless steel and other materials that ensure cleanliness and safety in food processing. The RZ10-100E-14ZK rotary vacuum packaging machine is also equipped with an oil-free vacuum pump that avoids pollution in the production environment.

Waterproofness of RZ10-100E-14ZK rotary vacuum packaging machine

In addition to the above features, RZ10-100E-14ZK Rotary Vacuum Packing Machine has a waterproof design that allows for direct water-washing of the machine surface, making it easy to clean and prolonging its useful life. The RZ10-100E-14ZK rotary vacuum packaging machine also adopts a concentrated oil-supplied lubrication device inside the grooved cam, making it more efficient in its operations.

The RZ10-100E-14ZK rotary vacuum packaging machine is suitable for different bag types, including pre-made bags, and it provides high sealing quality, which upgrades the finished product. RZ10-100E-14ZK Rotary Vacuum Packing Machine has different workstations, which can be seen in the image below, making it easier to adjust the machine for different products.

Overall, RZ10-100E-14ZK Rotary Vacuum Packing Machine is a high-quality automatic vacuum packing machine that is suitable for various industries due to its wide applications, ease of operation, and perfect prevention system.

Main Specification

Model	RZ10-100E-14ZK Rotary Vacuum Packing Machine
Bag Size	W: 60-100 mm; L: 80-190 mm
Filling Range	≤ 200 g
Packing Speed	≤ 100 bags/min (depending on products and bags materials)
Weight	3000 kg
Dimensions (L*W*H)	2610 mm*1800 mm*1800 mm
Total power	11.27 kw
Driving Power Source	380 V three-phase five line 50 HZ (other power can be customized)
Compress air requirement	≥ 0.5m ³ /min (Compressed air is provided by the customer)
