

AET-P/S Electrical Shrink Tunnel

Description

- Stable and uninterrupted production, reducing scrap rates.
- Compatible with various bottle types and film materials, offering high flexibility.
- Energy-efficient design, providing significant environmental and cost benefits.
- Easy to operate, reducing training and labor costs.
- Meets industrial safety standards, ensuring safe integration into production lines.

Features

- **Suitable for various bottle types**
Improve equipment utilization
- **High-performance design**
Durable and energy-saving, reducing production costs
- **Digital temperature controller**
Controllable and stable quality
- **Anti-scalding design**
Improve work safety

Specification

| Model | AET-100P/S | AET-200P/S |
|-------------------------|-------------------|-------------------|
| Machine Dimensions (mm) | 1000 x 600 x 1800 | 2000 x 600 x 1800 |
| Power Supply | 3P / 220V~415V | |
| Power Consumption | 12KW | 24KW |
| Weight | 150KG | 250KG |
