

Automatic Packaging Machinery Biscuit Flow Wrapping Feeding Packing Machine Snack Food Packaging Line JY-L800

The fully automatic pillow packing line is suitable for pillow packing of fragile surface and easily damaged items, such as chocolate, wafer, puff, nougat, biscuits, pine tower, cotton candy and other candies and their coated products. It can achieve full automation from the output port of product molding equipment through docking conveying, shunt, finishing and packaging, and can be customized to meet the output of supporting molding equipment through various ways.

Specification

Performance Characteristics:

- * Stainless steel 201 machine frame.
- * Can be connected directly with production line, make products sending, forming, filling and sealing with fully automatic.
- * Full automatic, Photoelectric sensor tracking system, no empty package.
- * Multiply Servo motor configuration (Nine servo motor) simply construction, easy maintenance.
- * With automatic film roll link, Reduce packaging waste and improve work efficiency.
- * High speed, Durable structure.
- * Stainless steel body frame, all belt with food grade PU

Technical Parameters

Model No.	JY-L800
Packing speed	50-800 bags/min
Finished Bag Size	15-200*15-60*5-30mm
Voltage	380V; 50HZ, 3phase
Total Power	9.5KW
Net Weight	2800KGS
