

JS-280A Automatic Vertical Small Granule MSG Pepper Salt Sugar Packing Machine

The small vertical granule packing machine is typically used to package granular products like sugar, salt, seeds, nuts, spices, coffee granules, detergent powder, etc., into pouches or sachets. These machines are compact and efficient, ideal for small to medium-scale production setups.

The small vertical granule packing machine is suitable for packing granular materials in food, daily necessities, chemical and other industries.

Food: coffee beans, instant coffee, nuts, peanuts, pistachios, beans, sugar, salt, monosodium glutamate, pepper, candy, pet food, etc.

Daily necessities: washing powder, desiccant, fragrance particles, silica gel particles, etc.

Feature

1. Weight measuring, bag making, filling, sealing, cutting and bags counting can be done automatically.
2. Computer PLC control and automatic alarming function.
3. English and Chinese human-machine operation interface, it is easy to operate, a high degree of automation.
4. High sensitivity photoelectric eye color tracing, more accuracy.
5. Famous brand components, ensure the quality and durability of the machine.

Specification

Packing Speed	30-60 bags/min
Filling Range	1-100g
Bag Width	30-130mm
Bag Length	30-170mm
Film Width	MAX.280mm
Bag Type	Back seal, 4 side sealing, 3 side sealing
Packaging Material	Laminated film like OPP/CPP, OPP/CE, MST/PE/PET/PE
Machine Size	740(L)*940(W)*1750(H)mm
Voltage	220V, 50Hz
Power	1.2Kw
Machine Weight	300KG
