

SED-2KJ-A Full Automatic Coffee Capsule Filling Sealing Machine

Product Description

Coffee capsule filling machine is a full automatic packaging production line. This machine adopts stainless steel fuselage, accords with hygienic requirements and cleanliness.

And it is specialized for producing coffee capsule to be filled and sealed.

It can be applied to Nespresso, k cup from automatic lift cups, quantitative filling, heat sealing system, and a series of processes can be automatically completed.

We possess more than ten years experience of production in this line. The advanced technology and equipment in the industry adopt the famous brand control system and pneumatic components in Japan, Taiwan and China, which has the characteristics of low failure rate, stable operation and long service life.

Detailed Parameters

Product Name	Rotary coffee capsule filling and sealing machine
Material	stainless steel
Voltage:	220V/380V
Power	3.5KW
Output	2000-2200 cups per hour(2cups)
Filling Range	2-20grams
Dimension	120*120*180 cm
Machine Weight	About 500kg
