

DC-890

Fully Automatic Multi Lanes Stick Type Packaging Machine

DC-890 fully automatic multi lanes stick type packaging machine can be applied to food, pharmaceutical and chemical industries, packing food, powders and granules in over-wrap stick sachets. The machine can be tailored made to 6, 8 or 10 lanes according to customer's requirements about bagging size and filling capacity, greatly improving the production output. The machine is user friendly, sachet length and production time can be adjusted just by inputting data and production info can be stored. It meets customer's requirements about large output and fast production.
