

4-Side Sealing Bag VFFS Machine

The 4-side sealing bag VFFS (Vertical Form Fill Seal) machine is suitable for packing granule, power, solid state materials, such as coffee, potato chips, puffed food, shrimp crackers, peanuts, nuts, popcorns, salt, sugar, tea, seeds, etc.

Main Features:

- A. RezPack 4-side sealing bag vertical form fill seal machine provides attractive bags for customers.
- B. The 4-side sealing bag VFFS machine accomplishes bagging, sealing, date printing, punching, and counting automatically.
- C. The film drawing down system is controlled by a servo motor, offering automatic rectifying deviation.
- D. The 4-side sealing bag VFFS machine makes use of famous brand PLC and pneumatic system for vertical and horizontal sealing.
- E. With low maintenance cost, the 4-side sealing bag vertical packaging machine is easy to operate, and compatible with different internal or external measuring devices.

Main Specifications:

Machine name	4-Side Sealing Bag Vertical Form Fill Seal Machine
Capacity	50bags/min
Bag size	L: 80-350mm
	W: 110-260mm
Bag type	3-side seal,4-side seal
Max. film width	520mm
Film thickness	0.04-0.08mm
Pulling belt type	double belts
Air consumption	0.8Mpa 0.6m ³ /min
Power source	4KW 220V 50HZ
Dimension	L1380×W1220×H1650mm
Weight	750kg
