

DZH-100B Automatic Foil Roll Cartoning Machine

The Machine is successfully researched by our company through accumulation the advantage of the similar products from abroad, design with our own new innovations characteristic of pneumatic-photo-electric-mechanic integration with high performance. Products, which make the preservative film, foil roll automatic boxing packing instead of manual, which raise working efficiency, achieve fast packing demands, then always keep sterilization when higher speed running. The machine suitable for each different specification preservative film, foil roll and relate similar for each different specification preservative film, foil roll and relate similar products boxing packing, machine automatic following the material feeding, boxing opening and box package process (the hot glue sealing device for option); the machine adopts PLC photo electricity each parts, stopping automatic when have trouble during running and appear the trouble reason. Machine can be used single also can be connected with foil roll machine and make the production line.

TECHNICAL PARAMETER

Output Capacity (box/min)	50-100
Volume of Consumption (L/min)	120-160
Box Requirement(g/m ²)	250-350
Box Size(mm)	Max Size 200×80×50
	Min Size 50×20×14
Leaflet Requirement(g/m ²)	55-65
Leaflet Size (mm)	Max Size 240×190
	Min Size 80×90
Power Supply	AC 220V 50HZ 2.1KW
Overall Dimension(mm)	3100×1100×1600
Weight(KG)	1500
