

Semi-Automatic Capsule Filling Machine CGN-208

Advantages and features

Usage:

Semi-Automatic Capsule Filling Machine collects machine, electricity and air to a body, separately completes the functions as filling and closing etc. Featured by easy to operation and accurate filling, it is suitable for filling powder or pellet medicine and health products into capsule.

Feature:

The feeding propeller and filling rotary table are all adopted with steeples frequency control that can run automatically. Remove the traditional gear box, that has simple and cramped construction, easy maintenance and operation.

Technical parameter:

Production Efficiency	Ten Thousand Pills(Tablets) /hour
Applicable Capsules	Hard capsules (No.0,1,2,3)
Total Power	2.2kw
Power supply	380V / 50Hz
Weight	400kg
Overall dimernsion	(L×W×H)1200×700×1600mm
