

Danrel Co., Limited

High Quality Ultrasonic Plastic Tube Filling and Sealing Machine

Feature:

1. Ultrasonic sealing method, fast and nice looking seal, stable output
2. Machine with 10 working station (10 tube on the working table)
3. Machine with filling function, standard: 25-250 ml. Other filling volume optional: 6-60 ml, 10-120 ml
4. Machine with the filling function: sealing, trimming, batch Number coding, tube orientation.
5. Machine of PLC touch screen operation, easily parameter setting
6. This machine is suitable for Plastic tube, composite tubes, lamination tubes, PE tubes. Of wide application
7. Machine is of high efficiency, suitable for mass production requirement
8. The whole machine of stainless steel, meet with GMP requirement
9. Main parts of imported brand of Japan and Taiwan, meet with CE requirement

Technical Parameters:

Power suply Ultrasonic Tube Sealer	220V 50/60Hz
Transducer Apparent power	1250W
Ultrasonic frequency	20 KHZ
Delay time	0.1-9.9S
Welding time	0.1-9.9S
Trimming time	0.1-9.9S
Horn jounery	80mm
Efficiency	20-30 tubes per minutes
Filling Volume range	6-60 ml, 10-120 ml, 25-250 ml
Tube height	50-250 mm
Sealing diameter	10-50 mm
Dimension	1550*1030*1690 mm
Net weight	450 KG
