

High Capacity Blender Powder Mixer Blending Machine SH100-600

The SH series mixer is widely used in pharmacy, chemical industry, food industry, scientific research, etc. It is suitable for mixing dry-powder or granular materials with good flowing properties.

As the mixing vat is able to make multidirectional motion, it makes raw materials inside the vat has many cross-mixing points, therefore the mixing effect is better. Its degree of uniformity can achieve above 99.9%.

The max. loading efficiency can be 0.9 (The loading efficiency of ordinary mixer is 0.4-0.6). The mixing time is short and efficiency is high. The materials are mixed in an enclosed state with no contamination to the working environment and materials.
