

BC20 Box Closing Machine

It automatically folds the wings and closes the box lid. When the flaps are folded, the lid is closed by the hot-glue bonding technique (it is made by spraying the glue to some required points with a gun). The format change is easily performed by the electronic system with easy settings.

General Features

- Mechanical and pneumatic operation
- Painted steel construction
- Inverter controlled Variable speeds
- PLC controlled System
- Boxes are moved with intermittent movement
- CE Certificated.

Mechanical Speed	Up To 30 cycle/min
Box Width	min. 80 mm - max 300 mm
Box Length	min. 60 mm - max 450 mm
Box Height	min. 60 mm - max 180 mm
Power Consumption	2.5 kW
Voltage	380 V 3 Phase 50 Hz
Air Consumption	100 l/min
Air Pressure	Min 6 Bar
Weight	800 kg
Dimensions (Width x Length x Height)	1020 x 2225 x 2680 (mm)
