

Automatic Horizontal Labeling Machine SL-5314S

Features:

1. High precise server motor, so it realizes real closed loop controlling. The high accurately subdividing and the inside encoder guarantee that it is very accurate to label.
2. The separated clutch makes the strain more balanced. It ensures accurate to label.
3. Advanced and kind human interface system
4. Famous and stable PIC controlling
5. Belt conveyor line: Suitable to assorted flat surface labeling. Added with optional product clamping device or mould for labeling, more accurate labeling is achieved.
6. With optional paging device, it can be used to separate piles of paper, envelopes, greeting cards, paper box (unfolded mode), accurately and promptly.

Parameters:

- producing speed: 30-50min/ meter
- labeling accuracy: $\pm 1\text{mm}$
- label max width: 100mm
- label inner diameter: $\phi 76\text{mm}$
- label outer diameter: $\phi 300\text{mm}$
- outline size (LxWxH): 1500X650X1600mm
- using power: 220V 50Hz 1000W
