

Drum Bottle Washer

This drum bottle washer is specially designed for cleaning penicillin bottles, infusion bottles, and more.

Rotary drum structure is designed for it, and bottles can be fed by bottle plate or air cylinder. Running water, distilled water and purified compresses air are used alternately to wash bottles.

Features:

1. Stable operation, reliable performance, and good washing capacity.
2. Capable of washing bottles with different sizes.
3. No damage for bottles when washing.
4. One-button operation system ensures its easy control.
5. Easy to install and maintain.

Main Parameters:

Production Capacity	4800~6000 bottle/hour
Bottle Size	50ml-500ml glass bottle
Consumption of Recycling Water	0. 5 m3/h
Water Pressure	0. 25-0. 3Mpa
Consumption of Steam Water	0. 5 m3/h
Water Pressure	0. 20-0. 25Mpa
Consumption of Compressed Air	30m3/h
Air Pressure	0. 20-0. 25Mpa
Power	2kw
Electric Supply	380v/50hz, 3 phases
Size	2000×1400×1500mm
