

## *Linear Screw Capping Machine*

Linear Screw Capping Machine integrates automatic bottle feeding, automatic capping, automatic capping and automatic bottle discharging. The operation is stable and reliable, and the operation is simple and convenient. It is a standard plastic and metal thread circle for food, beverage, and medicine and health care products.

### **Overview:**

Linear Screw Capping Machine is developed by our company with advanced foreign high-speed capping principle and technology, combined with its own years of production experience. Linear Screw Capping Machine integrates automatic bottle feeding, automatic capping, automatic capping, automatic capping and automatic bottle discharging. The operation is stable and reliable, and the operation is simple and convenient. It is a standard plastic and metal thread circle for food, beverage, and medicine and health care products.

### **Parameters:**

- Capping method: 8 pairs of capping wheels
- Cap range:  $\Phi 10\sim\phi 55\text{mm}$  (can be customized according to requirements)
- Adapt to bottle height: 50~300mm (can be customized according to requirements)
- Production capacity: 35~80 bottles/min
- Rated voltage: 220V 50HZ
- Power: 2.5KW
- Air pressure: 0.6~0.7Mpa
