

Cutting Wrapping Shrink Bottle Packing Machine JMB-150A

Working process: Cutting Wrapping Shrink Bottle Packing Machine USES shrink film to wrap in the product or package, after heating, shrink film to shrink the product or package, fully show the appearance of goods, improve the product display, and increase the sense of beauty and value. It is a kind of automatic and unmanned packaging machine, which can be used in automatic packaging line.

Technical Parameters:

Model	JMB-150A
Max. packed size	600*400*350 mm (L*W*H)
Shrink film material	PE (preferred), PP, PVC, POF
Shrink film thickness	0.03-0.15 (mm)
Oven temperature	160 - 250° C
Max. output	4-8 packs/min
Power consumption	18KW
Voltage	AC 380V/220V, 3 Phases
Dimensions	4750*920*2100 mm (L*W*H)
Weight	900KG
