

## *GZJ-100B Automatic Composite Tube Filling and Sealing Machine*

GZJ-100B Plastic (composite) hose and sealing machine is mainly used for a driving principle. Use segmentation mechanism driven turntable mounted fixture for intermittent operation, automatic filling and complete internal and external heating, sealing, play yards, trimming, finished withdraw a series of functions. Filling accurate measurement, the heating time is stable, adjustable, sealing beautiful appearance, neat, strong, health, trimming smooth.

The machine is set for 10-bit, in addition to the artificial tube, the other can be done automatically. Stable and reliable, no noise and other pollution.

Where the whole contact material and certain related parts are made of high quality stainless steel production, the need to clean parts are made of quick-change device, easy washable. Where some material need heating insulation, which can be equipped with external barrel heating thermostat. Any use of plastic pipe and composite pipe materials as a packaging material, you can rest assured that the choice of aircraft. Cosmetics industry, medicine, adhesive industry, shoe polish and other industries as well as other relevant sectors chosen a good product.

**Suitable for:** oils, hair care, skin care category, cosmetics, cleaning, detergent, toothpaste, glue, syrup, liquid alcohol.

**Applicable industries:** cosmetic, pharmaceutical, chemical

## Technical Parameters:

Model	GZJ-100B
Brand	JINGFENG
Custom processing	Yes
Voltage	220V±10%
Power	500W*2 250W*2
Filling head	1
Filling accuracy	±1 (%)
Packing type	composite tube
Tube height	Adjustable (mm)
Tube dia	Adjustable (mm)
Working capacity	20—32pcs/min
Filling range	5~50g,10~100g,20~200g (Customized)
Machine size	1200*1030*1900 (mm)
