

## NJP-1250B/C/E Automatic Capsule Filling Machine

- Improved total closed rotating turret, easier for cleaning.
- Single motion design of upper and lower segments with imported double lip seal rings for better sealing performance.
- Cleaning station with air blowing cleaning structure for better high speed performance to ensure cleanness inside segments holes.
- New whole working area sealing technology gives a negative pressure inside working area, to prevent dust leakage for a health working condition for operator.

### Technical Parameters:

Model	NJP-1250B / C / E
Filling Dosage Form	Powder, Pellets
Capsule Size	000#, 00#~5# and Supro A~E
Max. Output	75000 Capsules/Hour
Motor Power	2.67kw
Power Supply	AC 380V; 50Hz
Noise	≤75dBA
Vacuum Degree	-0.02~-0.06 MPa
Compressed Air ( clean segment )	Air consumption: 5m <sup>3</sup> /h Pressure: 0.3~0.4 MPa
Dimensions	870×1020×1850mm
Weight	900kg
Supporting Cleaner	XCJ-300(3kw)
