

## ***Full-Automatic Heat Shrink Packing Machine QL5545/BS-D4520***

Full-automatic heat shrink packaging machine is an automatic unmanned edge seal packaging machine, with reasonable structure, stable and reliable operation, and high finished product rate, especially suitable for connecting with the production line. Full-automatic heat shrink packaging machine could save packaging materials, and could automatic feed, delivery, bagging, sea-shrinkage completed at one time. It is high work efficiency, suitable for different heights and widths of products. It is widely used for mass production packaging of long products.

### **Product Features:**

1. The machine sealing knife uses special alloy material to spray Teflon. Effectively ensure that the sealing and cutting are not mucous membranes and the sealing is firm;
2. Complete machine complete automation system with photoelectric detection, unmanned automatic operation;
3. Product conversion specification adjustment, only need to be adjusted by hand wheel, can be directly connected with the production line;
4. This machine has the most basic protection function to prevent miscue packaging.

### **Application**

Fully automatic heat-shrink packaging machine widely used in the shrink packaging of cosmetics, printed matter, pharmaceuticals, software, food, beverage, hardware, and plastics industries, Applicable to the packaging of various shrink packaging materials such as POF. PE, PVC.

**Product Parameters:**

<b>Product name</b>	<b>Full-automatic heat shrink packing machine</b>	
Specification	<b>QL5545</b>	<b>BS-D4520</b>
Bag size(mm)	H≤130L+2H≤550W+2H≤450mm	W450xH200mm
Maximum seal size	L550xW450mm	
Capacity factor	1.30KW	8.5KW
Speed(bags/min)	0-16m/min	
Power	220V50HZ/60HZ	380V50HZ/60HZ
Air pressure	5(kg/cm <sup>2</sup> )	
Weight	320kg	210kg
Dimension	L1700*W900*H1400mm	External Dimension L1600xW730xH1400mm
		Inside Dimension L1200xW450xH200
