

## Belt Turning Belt Conveyor for Beef

Stainless steel horizontal belt conveyor is mainly used for the horizontal transportation of granular materials, it is very suitable for food, agriculture, daily chemical, chemical and other industries in a wide range of free flow of products, such as leisure food, frozen food, vegetables, fruits, candy, dried fruit, figs, beans, chemicals, pet food and so on.

### Features:

1. Adopt 304 stainless steel material and food grade plastic.
2. No noise, easy to clean.
3. Stable and reliable operation.
4. It can be customized according to customer requirements
5. Acid resistance, corrosion resistance, solid insulation.
6. Not easy to aging, high strength.
7. Adopt professional motor, long service life.
8. Mobility with wheels.
9. Durable configuration, large delivery capacity.
10. Low energy consumption and maintenance required.
11. Simple structure, small cross section scale.

### Parameters:

Model	SP- 300
Frame materials	304 stainless steel or carbon steel
belt material	PP belt, PVC belt, PU belt, stainless steel belt
Machine height	Can be customized
voltage	AC220V or three- phase 380V, 50Hz / 60Hz
Power	1.1kw
