

V-600 Hot Selling V type Mixer

This series of machine are designed with high efficiency and high accuracy. It is widely used for dry material grains in the field of medical, chemical, food, metallurgical and other industry.

The machine is mainly composed of mixing tank, spiral agitating vane and transmission parts. There are two layers of spiral agitating vane. The outside vanes accumulate the material from side to center, while the inner vanes separate the material from center to side. So that material will mix to each other in convective mixing inside the tank. It's highly efficient.

Features

With novel design, compact structure and beautiful appearance, the machine can reach mixing evenness of 99% . It has such features as stable running, reliable performance and convenient operation. The inner and outer walls of the barrel are subject to mirror polishing, easy cleaning and without any dead corners and cross contamination, meeting GMP requirements.

Technical Parameter

Style:	V-600
Total volume(L):	600
Working volume(L)	400
Working capacity(KG/batch)	200
Feeding time(min):	6~10
Mixing time(min):	10~30
Power (kw):	3
Speed :	7 rpm -15 rpm
Overall deminsion(mm):	3200×1300×2600
Rotation height(mm):	2600
Weight (kg):	1500
