

SP-XG Automatic High Speed Capping Machine

SP-XG automatic high speed capping machine is an automatic inline belt capping machine. This machine is a universal capping machine based on the experience of domestic and foreign capping machines for the versatility of the cap types.

Advantages:

Change the bottle or lid, no need to replace the accessories. Just adjust it on the equipment, and the screw cap has a high qualification rate, high speed, and easy operation and maintenance. Since the capping wheel is away from the drinking and drinking device, the cap is ensured to be in place without over-tightening and damaging the cap; two additional bottle-holding ring-belt mechanisms are attached, and an unstable bottle or high bottle is also suitable. The device is equipped with an aluminum foil eliminator, and the aluminum foil-free cover is automatically removed before the lower cover, ensuring that the cover of the aluminum foil is 100%. The main parts of this machine are made of high-quality stainless steel and meet the GMP requirements.

Main Parameter:

Voltage	220V 50Hz
Machine power	2KW
Capping speed	≤5400 bottles/hour
Caps size available	φ12mm~φ70mm
Bottle size available	φ35mm~φ96mm
Machine size	2400 × 960 × 2100(L*W*H) mm
Weight	550kg
