

## ***BTB-300 Transparent Film Three-Dimensional Packaging Machine***

The transparent film packaging machine is to wrap a layer of transparent film with anti-counterfeiting easy pull line on the outside of the carton or hard square object, and the packaging effect is the same as that of cigarette outsourcing. This machine is widely used for single-piece automatic packaging of various box-type articles in the industries of medicines, health products, food, cosmetics, stationery, audio and video products.
