

RFXG-40A Filling Sealing and Capping Machine

The filling sealing and capping machine is suitable for medication, food and chemical industry. It got the functions of filling with heat preservation, sealing film, capping and locking automatically with the materials of high viscosity paste. This bottle filling and capping machine equips with PLC controller and human interface, makes the structure compact, operation easy and performance stable.

Parameters

Main Motor Power	0.4kW
Pusher Servo Power	0.4kW
Production Capacity	30 to 40pcs/min
Power Supply	1P 220V 50Hz
Compressed Air	0.6 to 0.8 Mpa
Sealing Temperature	245°C
Filling Volume	45 to 250ml
Filling Accuracy	≤1%
Dimension	1755×1280×1830 mm (Exclude conveyer belt and cover neatening device)
Weight	600kg
Total Power	2kW
