

FR –770 Plastic Bag Sealing Machine

FR – 770 series plastic packaging machine suitable for sealing, adopts electronic constant temperature control and speed transmission mechanism, automatic and continuous sealing materials of plastic film, According to the need to also can configure creasing printed wheel and counting device.

Features:

Adopt speed control and electronic thermostat control device transmission mechanism.

Its sealing length is not restricted, high efficiency, reliable sealing quality, reasonable structure, easy to operate and so on.

Suitable for sealing packaging of various bags, and can connect with kinds of packaging lines.

Need to be heated before use.

Technical Parameters:

Product Name	770 Plastic Bag Sealing Machine with factory price
Machine Power	500W
Printing Mode	Steel Seal
Temperature control range	0-300°C
Sealing speed	1-12M/MIN (adjustable)
Sealing length	Unlimited
Sealing width	6-15mm (adjustable)
Sealing thickness	0.02-0.8mm
Max. load-bearing	<5kg
