

Auger Filler RZFJ-2000

Automatic auger filler suits use for filling various powder with easy flow or poor mobility as well as small particle products. For example, the auger filler is ideal for milk powder, protein powder, cocoa powder, coffee powder, additives, small granular medicines, veterinary drugs, glucose, spices, solid beverage, toner, toilet powder, pesticides, and others.

Main Features:

1. With all parts made of stainless steel, the auger filler is easy to clean.
2. The filler provides high precision, with adjustable filling volume and speed.
3. PLC control system, stable working, anti-jamming, high precise weighing.
4. Combined with packaging machine and other packaging related equipment.

Main Specification:

Machine name	Auger Filler
Model	RZFJ-2000
Working mode	Auger rotation filling tracked by weighing feedback
Packaging weight	10-2000g (Exchange auger accessory)
Weighing range	1-2000g (with a resolution of 1g)
Weighing accuracy	Package weight(≤ 100g): error ≤±1; (≥1000g): error≤±0.5%
Working speed	10-45 bags/min
Total power	1.5KW
Weight	260kgs
Dimensions	1000×1275×2200mm
Hopper volume	39L(60L for oversized hopper)
