

Small Scale Automatic Honey Filling Machine CK-GZ2GT

This honey filling machine for sale is high speed automatic filling equipment. The honey filling machine is used in many industries and products, such as jam, cream, balm, syrup, etc. It is an ideal equipment for filling liquid into bottles or jars.

honey

cream

syrup

peanut butter

shea butter

Honey Filling Machine Features:

1. All working procedures of the machine are controlled by a PLC control system, making it easier to adjust the working status and filling steps of the machine.
2. The honey filling machine for sale design is reasonable, the structure is compact, the appearance is beautiful, the performance is stable, the filling precision is high, the operation is simple, and the maintenance is convenient.
3. The material contact part is made of stainless steel, which can avoid product contamination and facilitate machine cleaning.
4. The automatic honey bottling line has two filling heads that are driven by two cylinders to fill the material more quickly and accurately.
5. The seal is made of silicone rubber (wear, high temperature, acid and alkali, corrosion resistance), fluororubber (wear, strong acid and alkali, strong corrosion)

Our honey filling machines are sold in many countries and the feedback is very good. Through the feedback from customers, we have improved the machine to make it more in line with the needs of customers, and won the praise of customers.

Model	CK-GZ2GT
Filling Bottle	PET bottle,glass bottle,etc
Measuring range	10-1000ml(can custom)
Bottle Size	∅20-150 mm,height10-250mm
Packing Speed	10-20bottle/min
Filling valve number	2
Voltage	220VAC/50HZ
Power	500W
Dimensions	2000L×1000W×1850H
Weight	350KG
Precision	≤±1%
