

SRD Model of Bottle Overturn Sterilizer

This machine is mainly used on fruit juice or tea drink hot bottling lines. It could overturn bottles (glass bottle or PET bottle), which have been filled and sealed, to sterilize inside of bottle mouth and caps by high temperature drink in bottle. Chain conveyer overturns finished bottles from upright to horizon when sterilizing cap and bottle mouth. And the conveyer transfers bottles into cooling tunnel. Features: top grade of conveying chain is used on the machine, more stable and reliable when it is working, don't break bottles. Speed of conveying system is infinitely variable.

主要技术参数 Main Technical parameters			
型号Model	SRD-100	SRD-200	SRD-300
产量Capacity:	4000-6000B/h	8000-12000B/h	12000-18000B/h
适用范围Application Range:	塑料瓶 (Plastic Bottles) 玻璃瓶 (Glass Bottles) 屋顶包 (Roof-like Package)		
杀菌时间Sterilizing Time:	30-45S		
链带速度Chain Speed:	4.5-25m/min		
电机功率Motor Power:	1.5kw	1.5kw	2.2kw
外形尺寸Outer Dimension:	7350×731×1220mm	9350×731×1220mm	11350×731×1220mm
