

Semi-automatic L-type Heat Shrink Packaging Machine BSL450/500

1. Anti-sticky high temperature alloy "L" type sealing knife, sealing neat not cracking, no coking, do not smoke.
2. Plating Teflon non-stick layer, sealed knife when the mucosa is not sealed.
3. The product after sealing and cutting through the conveyor belt automatically transported to the shrink furnace, shrink packaging.
4. Manual rocker easy to adjust the conveyor belt level.
5. BSL450A with manual, automatic conversion function, automatically set by the time to automatically run. The complete action is done automatically by the cylinder, greatly reducing the work intensity and improving the production efficiency.
6. Double solenoid pulls the seal on the frame, increase the sealing pressure
7. Sliding film holder can be placed a variety of shrink film (up to 550mm), smooth drilling device.
8. Knife anti-overheating protection device.

Model	BSL450	BSL500
Maximum Seal Size	550 × 450mm	550 × 500mm
Packaging speed (min)	15/20 package	15/20 package
Use air supply	6kgcm ³	6kgcm ³
Power / Power	220V / 50Hz 1.2kw	380V / 50Hz 8kw
Dimensions	1550X750X1050mm	1500X850X1470mm
Machine weight	135kg	220kg
