

## *High Capacity Powder Pouch Packing Machine XY8-210-F*

### **Main Functions:**

1. Reduce production cost and management cost. One packing line reduce 4-10 workers, input cost will be in return within 1-2 years.
2. Upgrade products quality: the appearance and packing quality can meet unified standard.
3. Reduce defective rate, finished products ratio can reach to more than 99.5%, this can avoid the waste of manual packing.
4. Improve Hygienic standard: No direct contacting with persons, avoid man-made pollution.

### **Main Features: for the rotary pouch packing machine**

1. Wide packing scope: Suitable for packing materials in various shapes, forms and characters.
2. Convenient operation: Controlled by PLC, HIM operating system make it works conveniently.
3. Convenient adjusting: Materials change can be finished within 10 minutes.
4. Suitable for packing different kinds of bags.
5. Package part of machine is made of stainless material to ensure materials' sanitation and safety.
6. Use vacuum pump without oil to avoid production environment pollution.
7. Completely prevention system to guarantee finished products ratio, no waste of bag and materials.
8. Some parts use imported engineer plastic, no need adding oil, this can reduce materials pollution.
9. High automatic grade: Unman-made weighing and packing process, automatically alarm when break down happen.

**Technical parameters:**

| <b>Model</b>     | <b>XY8-210-F</b>  |
|------------------|---|
| Bag Types        | Flat bad, 3 sides sealing, 4 sides sealing, Zipper bag, doy pack bag etc. |
| Packing Material | Composite film, PP etc.   |
| Bag Size         | W:100-210mm L:150-300mm   |
| Weight scope     | 5-1500g   |
| Packing Speed    | 20-45 bags/min( determined by material and its filing weight)             |
| Packing Accuracy | $\leq \pm 1\%$  |
| Voltage          | 3.76KW,AC380V,50HZ  |
| Machine Size     | 4200X1800X2400mm  |
