

Liquid Filling Machine ZCJ

This fully automatic net weigh filling machine is ideal for filling liquid products such as cooking and edible oils into drums or large containers. It can automatically implement complete operations including container in-feeding, weigh filling, container out-feeding. This net weigh filler is widely used in foodstuff, pharmacy, cosmetic and chemical industries.

Features

- This liquid filling machine is applicable to drum capacities of 5kg -30 kg.
- Each filling head is equipped with weighing and feedback system, and can be easily controlled.
- The net weigh filler uses PLC and touch screen control panel for easy operating.
- Photoelectric sensor, proximity switch and other electrical components are internationally renowned brands, ensuring that there are no missing filling containers. And the alarm will be activated when any container is blocked.
- This liquid filler adopts diving head to fill products, so that foam can be reduced.
- This liquid filling machine is built in compliance with GMP standard, and all the parts that contact with filling liquid are made of high quality stainless steel. It is an eco-friendly, safe and sanitary unit, and easy to clean and maintain.
- Adapting to a number of working places.

Technical Parameters:

Model	ZCJ-6
Dimension	3000×1700×2300mm
Filling head	6
Capacity(9L)	600 B/H
Capacity(18L)	500 B/H
Power	2KW
Suitable bottle	length:160-360mm width:100-300mm height:250-500mm
Barrel neck diameter	≥Φ40mm
Filling error	≤±0.5%F.S
Filling range	5L--25L
Air pressure	0.6Mpa--0.8Mpa
Power supply	220V ;50HZ
