

## *Cup Filling And Sealing Machine BZJ-series*

This machine is designed to fill and seal plastic cups or similar containers with liquid, cream and others. Whole process is fully automatic, including cup loading, cup filling, sealing, coding, and output. Cup filling machine series have capacities from 1500 to 16000 bph, satisfy most needs of factories. Top brands of components ensures a stable performance

### **Advantage**

1. Auto cup loading
2. Sealing film by sheets or by roll
3. Sealing twice and auto cutting
4. Precise filling
5. PLC control, easy operation, stable performance
6. With date printing, CE mark
7. It is use the air value filling head, this filling head suitable for high-temperature and low-temperature, no easy demand parts, guaranteed a long service lifespan
8. Automatic liquid level controller in the tank
9. Output: 2,000-18,000cph
10. Suitable for water, juice, soybean, milk and more
11. There are many models in this series able to satisfy with the different kinds of containers
12. The machine is all made of stainless steel
13. We can also make special ones according to customer's requirement
14. As the machine completed with date-code printer, coconut material filled

## Specification

Model	BZJ-2	BZJ-4	BZJ-6	BZJ-8	BZJ-10	BZJ-16
Voltage	380V 50hz,3P 4-wire system					
Power (KW)	2	3.2	5	6.5	8.5	12
Capacity(cup/h)	1500-2100	3000-4100	4500-6000	6500-7500	7000-10000	14000-16000
Air pressure	0.65-0.85Mpa					
Wight(kg)	700	800	900	1000	1100	1400
Dimension(mm)	3000×600×1500	3200×780×1500	3200×950×1500	3500×780×1500	3500×950×1500	4200×1200×1500
